May 2015

Dear Next Year's 7th Grade Parent(s):

We are pleased to let you know that your child scored in the advanced level of math in this spring's Performance Series and assessment history. As a result, we are placing your child in the algebra math book, skipping 7th and/or 8th grade math. However, there would be some gaps from skipping, so we would like your child to work over the summer on the web-based math program, IXL. Your child might be familiar with the program from 6th grade. You will find the login directions for IXL on the back side of this letter.

Attached are the IXL lessons that cover the material skipped. Your child's progress will be monitored over the summer, but completion is voluntary. Please check with the school office to make sure your email information is current in PowerSchool. This way we can communicate with you over the summer.

By being in the advanced class, your child will be placed in geometry for 8th grade, receiving high school credit, and then can follow this high school track: 9th grade – advanced algebra (Algebra II); 10th grade – pre-calculus/trigonometry; 11th grade – AP calculus; and 12th grade –jump start at KPC.

It is Skyview Middle School administrators' belief that your child is capable of doing the work and will be challenged in this class. If you have any questions, please do not hesitate to call Mr. Truesdell, Ms. DuFloth, or myself at 260-2500.

Ms. Natalie Kant
Counselor
