May 2017

Dear Next Year's 7th Grade Parent(s):

Math curriculum changes and changes in the Alaska State Standards may have created some gaps in math concepts among students. Skyview Middle School would like to offer incoming 7th grade students an opportunity to close those gaps during the summer.

Attached is a list of lessons from the web-based math program IXL. Completing these lessons to an 80 percent level will help to close any gaps in learning your child may experience. Your child might be familiar with the program from use during the 6th grade. You will find the login directions for IXL on the back side of this letter.

It is Skyview Middle School's goal that every student experience success, and filling in the gaps in math should accomplish this. Progress will be monitored during the summer. However, the program is completely voluntary. Please check with the school office to make sure your email information is current in PowerSchool. This way we can communicate with you over the summer.

If you have any questions, please do not hesitate to call Mr. Truesdell, Ms. DuFloth, or myself at 260-2500.

Ms. Natalie Kant
Counselor
